ORDERLY DISTRIBUTION of FOOD to POOR

In experience we found that collection was spontaneous, but there were incidents of slum-people rushing resulting in commotion and near stampedes. The people of the slums / street dwellers must be organized for the orderly distribution without any incidents.

There will be Community **ExNoRa** of, for and by the Slum Dwellers through which the food distribution will be made orderly, even distribution and real benefit to the poor people. Please see **ExNoRa**
