PLASTIC-DANGERS , the REAL ATOM BOMB

Plastic that came to make our life better has made it worse. It is not plastic's fault. But it is our FAULT.

“WORLD will be destroyed not by ATOM BOMBS, but the BOMBS that we throw everyday everywhere all the time called PLASTIC”

From **FANTASTIC**,
the life that is existing in the ***PLANETIC**,
only HOME has become **PATHETIC**,

*** PLANETIC is
PLANET + PLASTIC.**

due to **PLASTIC**.
It is causing **HAVOC**,
which is quite **TRAGIC**

***PLANETIC**

Our **PLANET** is caught in a **NET**
called **PLASTIC** due to HUMANS'
WRONG-PLAN or **NO-PLAN. PLANET** is now in a
PLANED-NET. HUMANS PLANNED to get caught in a
PLASTIC-NET and made the planet as **PLANETIC** .

What do you mean by **PLANETIC** (**PLANET**, our only **HOME** in a **PLASTIC-NET**) and the various problems because the **PLANET** became **PLANETIC** ?

**PLASTIC +
PLANET =
PLANETIC**

ATOM BOMB
last thrown on
August 6,
1945

PLASTIC BOMB
thrown by all
of us all the
TIME

“The Life on our Mother
Earth, our only HOME
will come to an end not by
ATOM BOMBS
but by
PLASTIC WASTE BOMBS

which pounds the planet every split
of a second, **60 x 60 x 24 x 365**

WAR-PLANES
dropped
ATOM-BOMBS
in 1945

But each one
of us drop
PLASTIC
ATOM-BOMBS
round the clock

WORLD is GETTING destroyed not by ATOM BOMBS
but by PLATIC-WASTE- BOMBS

PLASTIC DANGERS - Introduction

Where the exact Problems LIE?

In today's life , the relation between humans and plastics is compatible. Not a single day can be spent without the involvement of plastics.

It has become part and parcel of our lives. People have become “**PLASTIC BAG ADDICTS**”, as they are not aware of the hazardous nature of plastics.

PLASTIC PRACTIC ExNoRa

This is what going to happen if we keep on using PLASTICS

The Planet & Humans are getting wrapped by Plastics

PLASTIC DISASTER

Plastic pollution is indeed an insidious and the most ignored environmental health problem. People are so eager and busy making the whole nation a **MASSIVE DUSTBIN**.

They carry plastic bags and easily discard them carelessly by throwing them away through the windows of the train and buses during their travel.

Fishes prey on plastic carry bags as their food mistaking for jelly fish and

PLASTIC RIVER

THE PROBLEMS OF THIN PLASTIC CARRY BAGS

1. **Plastics are non-biodegradable.**
2. **Thus preventing water percolation into the soil surface.**
3. **Plastic dumped on land, choke the earth for hundreds of years, making the soil lose its fertility.**

PLASTIC PRACTIC ExNoRa

1. **Plastics thrown away in gutters and drains results in stagnation of water, which in turn encourages the growth of disease causing bacteria and breeding of mosquitoes.**
2. **Plastics pollute the ground water through leaching of toxic substances.**

PLASTIC PRACTIC ExNoRa

Grocery stores, textile shops, hotels, pharmacies, vegetable / fruit vendors and super markets, deliver goods in plastic carry bags.

It is PLASTIC PLANET!!

Even the flower vendor packs soft flowers in the subtle plastic bags.

It is PATHETIC PLANET !

The temple priest delivers prasadam including VIBHUTHI & KUNKUMAM using PLASTIC BAGS / SACHETS

by M3

Intake of food like hot sambar or curd Chutney packed in plastic bags get processed and can cause serious health problems.

Food items are packed in plastic sachets without any insulations pose danger to our health

Humans species thinking the planet has been created only for him, is causing indescribable agony and torture to animal kind

Fishes feed on plastics

plastic bag

Cattle eat
plastics & die

PLASTIC DISASTER

Seagull Eat
Plastic

Swans Eat
Plastic

PLASTIC DISASTER

Baby Monkey
eat plastic

Crow eat
plastic

Everyday items such as plastic bottles, toothbrushes, plastic bags, etc. seem so harmless.

These items and others composed of plastic do not break down for tens to hundreds of years. They either persist in landfills or are eventually washed into the waterways and the ocean.

Deadly Disadvantages Of Plastics To Nature

In the ocean, plastics either remain in whole pieces or broken down into tiny pellets. Ocean currents and storms carry these plastic items far out to sea or where they accumulate in gyres (large areas with water moving in a vortex pattern) or even wash up on remote islands.

Tiny filter-feeding animals often ingest the plastic pellets and larger animals, such as sea turtles and sea birds, mistake the larger plastic pieces as food or prey that the plastic particles travel to the food chain.

LAKE FULL OF PLASTICS

RIVER FULL OF PLASTICS

Plastic bottles has Bisphenol A. Commonly abbreviated as BPA, it is an organic compound with two functional groups of phenol. It is a dysfunctional building block of several important polymers and polymer additives. Its being produced 2–3 million tonnes annually. It is an important monomer in the production of poly carbonate.

PLASTIC PRACTIC ExNoRa via P3 by M3

In the 1930s, the use of bisphenol A in consumer products found to be hazardous to human race. It grabbed the attention of headlines in 2008 when several governments issued reports questioning its safety, and some retailers pulled the products off their shelves.

BURNING PLASTICS IS DANGEROUS

PLASTIC DISASTER

Plastics burning results in Air Pollution

Plastic Waste kills precious drinking water resources

PLASTIC FRANTIC

PET bottles and plastic carry bags heap along with metal waste and organic wastes.

Plastics burning results in Air and soil pollution and release of carcinogenic Dioxins and Furans.

Toxic fumes from burning plastics .

Plastic waste when mixed with the biodegradable solid waste blocks the normal process of microbial degradation and creates lot of problems like clogging of drain, artificial water logging, developing of waste land, loss of soil fertility and soil carrying capacity etc.

PLASTIC FRANTIC ENVIRONMENTAL IMPACT

Plastic is a popular, useful material but we use a lot of it. By optimising the lifespan of plastics by reusing and recycling items as many times as possible, for example, by recycling used plastic bottles into new ones, we can reduce our need to create new plastic.

The environmental hazards due to mismanagement of plastics waste include the following aspects:

Littered plastics spoils beauty of the city and choke drains and make important public places filthy;

Garbage containing plastics, when burnt may cause air pollution by emitting polluting gases;

Garbage mixed with plastics interferes in waste processing facilities and may also cause problems in landfill operations;

Recycling industries operating in non-conforming areas are posing unhygienic problems

What do you mean by

PLANETIC

(PLANET, our only HOME
in a PLASTIC-NET)

and the various problems
