# The situation of Ancient Temples today

Uniqueness of temple has thirty points with several sub points. Everything was told in the **PAST TENSE**, because most of the great features of temples are not there today.

**OMISSIONS**

(Failure to attend)

The tip of the iceberg . Gumidipoondi Shiva Temple.  
There are nearly 10000 temples like this

The 600 years old temple of **Sree Baleeswarar** in new Gummidipundi should have been a very great and grand temple in the days past, with its beautiful gopuram, vimaanam and the adjoining lotus pond. But today as you pass the area it is barely noticeable. Years of neglect and vandalism has eroded the temple and left its imprint on the face of this

# TEMPLES TRAMPLED

Temples crumble  
due to lack of  
maintenance

# TEMPLES TRAMPLED

**The walls have developed cracks due to non-removal of trees growing on them. The civil structure is not maintained. Small repairs are not attended to in time resulting in ruin of the whole structure.**

# TEMPLES TRAMPLED

Trees grown on the temples not cleared resulting in total ruin

# TEMPLES TRAMPLED

## The situation of Ancient Temples today

There are no more Temple parks (Nandavanam). Plants are dead without watering or full of thick weeds and bushes

Nandavanams today are Wilds Bushes

Weeds, shrubs and thorny plants grow on their own on the surface in and around the temple and nothing is done about it. This spoils the beauty of the temple and also results in the bushes becoming home for insects and also for snakes.

## BUT DIRTY THE FLOORS

Prasadams like vibhuthi & kunkumam after use, the surplus is thrown on the temple floors and the worshippers walk over the same . Only a minute ago they revered it so much .

## STRUCTURES ALTERED

The civil structure was made of granite stones. The sad thing is in the name of expansion of temple, concrete pillars, walls and roofs are constructed within the temple. It is violating the building plans of those who made it. More than 1000 years old architecture's beauty is marred by 21<sup>st</sup> Century concrete structures.

## THE SITUATION OF ANCIENT TEMPLES TODAY

The floor granite stones are found broken or they have been replaced by shining granite / marble stone / tiles. People are deprived of getting acupressure

**BEFORE**

People got  
acupressure

**NOW**

Now they  
skid

**ORIGINALITY ALTERED & SPOILED**

# TEMPLES TRAMPLED

Temples heritage part  
altered or allowed to get  
destroyed / decayed

People also write/ engrave their names on the walls. Students appearing for exam write their name and class, they are studying in as a form of prayer for getting through the exams.

# Public Disgrace

It is a disgrace that donors write their names on old marble walls and tube lights

# Public Disgrace

Vandalising,  
Disfiguring & Defacing

# TEMPLES TRAMPLED

## SHAMEFUL

Individual donors' names adorn the Temple walls, defacing the excellent architecture and marring its ancient beauty. The people who did the mammoth task of constructing the Temple never had their name anywhere in / on the TEMPLE, as they did it purely as a service to God without expectation of personal publicity. But today, unfortunately even a donor of a tube light has his name painted on it. The name written on the tube light is also becoming responsible for reducing the light output. Even the curtains in the praharam before the idol / deity has the donor's name on it. Commercial organisations like banks put neon signs and flashy plastic boards spoiling the beauty of ancient heritage and architecture. It is all great disservice to those who had the dream and vision and constructed the temple.
