TWO MINUSES MAKE A BIG PLUS

There is a practice in some places in India and China of Female baby infanticide and foeticide as girls are unfortunately considered a liability .

FEMALE FOETICIDE

Women are murdered all over the world. But in India a most brutal form of killing females takes place regularly, even before they have the opportunity to be born. Female feticide--the selective abortion of female fetuses--is killing upwards of one million females in India annually with far-ranging and tragic consequences. In some areas, the sex ratio of females to males has dropped to less than 8000:1000. Females not only face inequality in this culture, they are even denied the right to be born.

Female infanticide is the deliberate killing of newborn female children. In countries with a history of female infanticide, the modern practice of sex-selective abortion is often discussed as a closely related issue. Female infanticide is a major cause of concern in several nations such as China, India and Pakistan. It has been argued that the "low status" in which women are viewed in patriarchal societies creates a bias against females.

INFANTICIDE

Definition

- *“Killing of an entirely dependent child under “one year of age” who is killed by mother, parents or others in whose care the child is entrusted”.*

In order to carry more male calves they break the legs and heap on the transporting truck

Male calves are carried like this on a two wheeler

Cattle saved from Slaughter being brought to **ExNoRa** Zero Waste Centre

A.L. Sathish, the innovator of the idea of saving the male calves from being slaughtered & integrating the, in the Zero Waste Center

Town/Village level Composting separating organic waste for feeding to cattle saved from slaughter as a solution of making waste disappear & getting cow dung

After all 'COWDUNG' is an important ingredient in the 'WASTE PROCESS'

What we don't want is vegetable market waste which calves want . Calves in return give cow-dung which is an important ingredient in compost process

Male calves saved from butcher's knife & brought to zero waste centre. The calves eat Hotel / marriage hall plantain leaves & Vegetable market waste and contribute cow dung for compost process in the **ExNoRa** Zero Waste centre

~~Coffee Powder~~
Bio-Manure

Compost in Bags Ready for Sale

Ge-SoWaM
MBN

ExNoRa Zero Waste Centre & Male Calves Shelter

Each temple has so much of land . Should allot a small piece of two grounds of land in which ExNoRa Zero Waste Centre cum Male Calves Shelter can be located. The waste will become premium compost
