# Teach Reach ExNoRa Tuition Center

# THE GOAL

Giving quality education to less privileged children through tuition in order to help them in their overall development, equip them to face competition and make them worthier citizens of tomorrow.

## THE BACKGROUND

The Children belonging to economically weaker sections of society have a very less opportunity of going to school. And even those who go to school don't excel in education due to several reasons. One of the important reasons for their low marks is that they don't have the atmosphere as well as facilities in the home to study and do homework. They have too many distractions at home. All these things lead to de-motivation. If they are only brought to a place having better environment and guided as well as motivated by a teacher, it will make a world of difference. When they study together with other children, there will be a sprit of competition and the motivation level will automatically go up.

## THE BACKGROUND Continued

**ExNoRa** already is having Tuition Centers (mostly slum areas). **ExNoRa** has its organizational advantage. Youth **ExNoRa** & Student **ExNoRa** wings are growing very fast. Youth **ExNoRa** & Student **ExNoRa** with the help of hundreds of RWA **ExNoRa** Club (formerly Civic **ExNoRas**) in various streets and localities can easily start and run a Teach Reach **ExNoRa- ExNoRa** Tuition Center for slum children in their area. Even where there are no Civic **ExNoRas** , service minded persons, even individuals can come forward and group themselves to initiate and guide this wonderful HRD activity to benefit poor children.

# Collaboration

It can be done in collaboration with Private Schools and they can sponsor class room / teacher / student teachers etc.

- A qualified **ExNoRa** volunteer per center preferably retired persons and house wives

The teacher can be a volunteer. The best result can be realised by employing a regular part time teacher. There are several options like a qualified person, a school teacher to work part time in the evenings , a retired teacher, a person with minimum education having the passion from the very slum, etc.

It can be run out & out with Youth Volunteer Resource if there are sufficient Students & Youth who are willing to offer their little time . This can be done by a batch of 5 youth who go in the evenings by rotation . Then it becomes sustainable & free of cost.

The above team is indeed desirable. But absence of volunteers should not hamper the service. Even two interested persons can set the ball in motion. They can start Reach and build their Education ExNoRa gradually.

## 8. Funds

Funds are indeed important. Teach Reach ExNoRa has been designed that the activity is more effort-centric and coordination-centric than money centric. The main activity is tuition and hence the main expense will be the salary of the Teacher. The other expenses like those related to creation of tuition centre, books, note books ,uniform etc can be met through sponsorship of corporates , service Clubs like Lions, Rotary , Round Table, etc. and individual donors / philanthropists and plenty of them are there waiting to support a good cause. The members too can contribute money to meet the expenses besides their time and effort. The best option is through collaboration with Private Schools
