"LAKE RAIN WATER HARVESTING" NOT DONE

Puzhuthivakkam lake is full of Puzhuthis (dust).
When it rains the streets in Puzhuthivakkam are
flooded with water, but the lake continues to be dry,
because rain water is not harvested to the lake .
The Rain Water finds their way to the Bay of Bengal
through the Adyar river

Efforts on to desilt lake in city suburb

G Ramanarayanan

Efforts are on to clean and desilt the Puzhudivakkam lake in suburban Chennai. And residents in the suburb have sought the help of Neer ExNoRa, a civic organisation, in this connection.

At a meeting held yesterday with residents associations of both Puzhudivakkam and Madipakkam, the 27- acre the lake came up for discussion..While 90 per cent of the lake comes under Puzhudivakkam Municipal limits, the remaining 10 per cent comes under Madipakkam Panchayat.

The inlet for this lake that falls under Puzhudivakkam and Madipakkam has been blocked and residents feel that the water from Veerangal Odai can be diverted into this.

The officials of the Ullagaram Municipality had done their bit to desilt it periodically and prevent any noticeable encroachment

Website for water bodies

NT Bureau

An exclusive website for water bodies and an office were opened by founder of Exnora International M B Nirmal on 10 November at Rajeswari Nagar in suburban Puzhuthiwakkam.

Speaking at the inaugural function, director, Centre for Water Resources, Anna University, K Karunakaran appreciated the State government's efforts in protecting the water bodies taking into account the water scarcity in the recent few decades. .He cited the functioning of the various Water Users Association (WUA) and Participatory Irrigation Managements (PIM) among the existing farmers in various districts in the State. WUA and PIM help all irrigation sectors to make use of the water bodies fully without wasting a drop water. The problem of encroachments both by public and the government can be overcome by creating awareness among public, which the NEER Exnora was currently doing.

Chairman and COO of Futura Polyesters Ltd S Rangarajan, while launching the Neernilaigal Exnora's website www.neernilaigalexnora.com, said , ' A small beginning made today shall encompass entire Tamilnadu in the matter of rejuvenating tanks, desilting of ponds, lakes etc with the involvement of public and corporate houses.'

Pollution-free water is mantra today
G Ramanarayanan

Water, water everywhere but no drop to drink' should not be the condition. The life-sustaining ingredient should be pollution-free.

This is the message conveyed on World Water Day 2008 which was observed by Neer Exnora at SRM University in suburban Ramavaram. The World Water Day is being observed every year on 22 March..Thiruvallur Collector Rajendra Prasad was the chief guest and he distributed the Adoption Declarations of Water Project.

He told Neer Exnora to submit to him their workplan and methodology with the Collectorate so that he could try and support all good initiatives.

He said he understood the rationale behind the demand for 'TN Water Bodies Authority' and advised to follow it up with the assistance of Tamilnadu government.

Exnora Founder M B Nirmal delivered the welcome address. He appealed to the government to save the water bodies from ' Garbage, Sewage Abuse and Neglect' and take up their deepening and desilting. He exhorted the students to take a vow to protect all water bodies.
