Seeing the incredible mental strength and physical stamina of the youth living in slums, ExNoRa rightly understood that they should be given a positive alternative (football) through which they can channel their asset-strengths (which became a liability) and can involve and excel. ExNoRa through the Corporation of Chennai made the football ground much better and playable.

The place became the best in Chennai in football and most of the TOP football teams of Chennai like Railways, MTC, Police, Port Trust, the Central and state Government Departments plus Corporate organisations recruit footballers from this place. The ground and the coaching is now providing jobs as footballers to hundreds. The place that was producing knife-wielding youth, has now youth kicking football and finding lucrative jobs
